***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 defines frying the organic material to remove at least 80% of the moisture. However, subsequently, the term, "submitting the energy storage form to sufficient heat from conventional oven or from sources of waste heat to further alter its chemical composition into a fuel", is vague and indefinite. No guidelines or steps are offered for this further drying. It is not clear when such drying is complete, placing it in proper form for the microwave device. It is not clear how this drying is responsible for placing the fuel in a carbonized form proper for the microwave device.

The claims are required to be further defined to set forth the subsequent drying step to place the fuel in proper carbonized form for vaporizing. If not placed in this form then the fuel would merely be cooked, and not vaporized for heating purposes.

In claim 1 in limitation c, the term "fusion energy" is vague and indefinite and need to be further defined or removed, since it is not clear just what type of fusion energy is produced. Dependent on what kind of fusion, containment of the same would be necessary.

The claims will be examined in light of prior art when amended to remove the above deficiencies.
